EDUCATION

Chonnam National University
B.A. in International Trade
2019.09 – 2023.08 · taught mainly in Korean

LANGUAGES

Korean — business level (Korean-taught degree, living in Korea)

English — fluent

Uzbek — native

Russian — elementary+

TECHNICAL SKILLS

Frontend

HTML, CSS, Sass, JavaScript, TypeScript, React, Next.js, Redux, TanStack Query (React Query), React Router, Apollo Client, Axios, jQuery, EJS, Socket.IO Client, Tailwind CSS, Material UI, Chakra UI, shadcn/ui, Bootstrap, Framer Motion, Anime.js, Three.js, Swiper, Typed.js, TUI Editor, TViewer

Backend & databases

Node.js, Express.js, NestJS, GraphQL, Python, PHP, MongoDB, Mongoose, PostgreSQL, MySQL, Redis, Socket.IO, JWT, express-session, bcryptjs, Multer

AI & agentic tools

Gemini, OpenAI, Claude, Codex, Cursor

DevOps & tools

Linux (Ubuntu), Nginx, Docker, PM2, GitHub Actions, DNS, firewall configuration, Cloudflare, Render, GitHub Pages, Git, Postman, Jest, npm, Yarn, NVM, MongoDB Compass, Figma, ESLint, Prettier

KAKHKHOROV Shokhjakhon (Sean)

Full-stack Developer

AI Engineering · Agentic Engineering · DevOps

3+ years of professional experience

PROFILE

Full-stack developer with 3+ years of professional experience building React and Next.js frontends and Node.js, Express.js and NestJS APIs on MongoDB, PostgreSQL and Redis, then deploying and running them on Linux servers. At IT Local, delivered websites for 20+ client companies in a team of four or more developers. Independently built and launched CreatorHub, including a Gemini-powered AI assistant, and works with coding agents such as Claude Code, Codex and Cursor.

WORK EXPERIENCE

IT Local — Full-stack Web Developer

Uzbekistan | 2023.06 – 2026.01

- Built and maintained websites for **20+ client companies** in construction, retail, food service, corporate and public sectors, in a team of 4+ developers.
- Developed responsive pages with React, Bootstrap and Tailwind CSS, and APIs with authentication, authorization and input validation.
- Designed database schemas and improved page and API response times through indexing and query optimization.
- Set up and secured **5–15 Ubuntu servers**; ran Node.js services with PM2 and Docker behind Nginx, with Cloudflare for DNS and TLS.
- Moved deployments from manual steps to **CI-based automated deployment**.
- Resolved outages from logs, reviewed teammates' code, and onboarded my replacement with a full handover.

Tech: Node.js, React, Tailwind CSS, Ubuntu, Nginx, PM2, Docker, Cloudflare, CI

Atlantis Investment — Backend Developer

Uzbekistan (alongside studies) | 2022.05 – 2022.12

- Built MVC-based RESTful APIs with Express.js, including session and JWT sign-in, bcryptjs hashing and Multer uploads.
- Designed MongoDB databases with Mongoose, with indexes for search, filtering and pagination; tested endpoints in Postman.

Tech: Node.js, Express.js, MongoDB, Mongoose, JWT, Multer, Postman

PROJECT EXPERIENCE

CreatorHub — creatorhub.site

Solo project · launched 2026 · designed, built and deployed frontend, backend and infrastructure

A portfolio-discovery platform for independent creators in Korea (English, Korean, Uzbek).

- Built a Next.js/React frontend with Apollo Client on a NestJS GraphQL API and MongoDB.
- Added a Gemini-powered AI finder that answers visitors from site content, with rate limits and a fallback model.
- Built private inquiries with live Socket.io chat and an admin-reviewed creator workspace.
- Implemented email, Google, Kakao and Telegram sign-in with JWTs and rotating refresh tokens.
- Deployed with Docker Compose and Nginx on a VPS; GitHub Actions runs **290+ automated tests** (162 backend, 108 frontend, 23 deploy).

Tech: Next.js, TypeScript, NestJS, GraphQL, Socket.io, MongoDB, Gemini API

Sofiya Bookstore Earlier project

An online bookstore with a basket, order tracking and a catalogue admin panel.

- Built a React/Redux Toolkit storefront on an Express REST API with MongoDB.
- Added JWT sign-in for readers and session login for an EJS admin panel.

Tech: React, Redux Toolkit, MUI, Express, MongoDB, EJS, Multer
